

In 2011 I decided to replace the 20 year old flat roof above my home. I made the mistake of hiring a well known firm who then hired inexperienced sub-contractors that did a terrible job. The new roof leaked and caused over \$15,000 damage to my house.

After the original contractor did nothing to help me, I made the wise decision to hire Hi-Tech Roofing to replace the defective roof. Hi-Tech Roofing started on my roof as soon as the weather permitted. They brought out a skilled crew who has been working together for a long time. Everyone knew their job and did it with great enthusiasm. There was no wasted motion or "on-the-job" training. Hi-Tech Roofing had several suggestions on how my roof could even be better. The results were outstanding. The attention to detail was amazing! When the manufacturer's representative came out to inspect the roof for factory warranty he said he had never seen such an excellent installation.

I am so pleased that I hired Hi-Tech Roofing to do my 6800 square foot flat roof. I only wish that I had hired them the first time! Don't make the same mistake... hire Hi-Tech Roofing to do the job right.
